

UNLIMITED PLM PERFORMANCE **DEVELOPED BY ISD**

Optimize your corporate processes

HELiOS is a multifunctional PDM/PLM solution that combines product, process and peripherals management in one single system. It allows a consistent storage, management and distribution of all process-relevant data in connection with the product life cycle. With HELiOS you can improve automation and benefit from many advantages – redundancy-free data management, automated workflows and reports, data security, effortless working across locations, and much more.

Don't search – find!

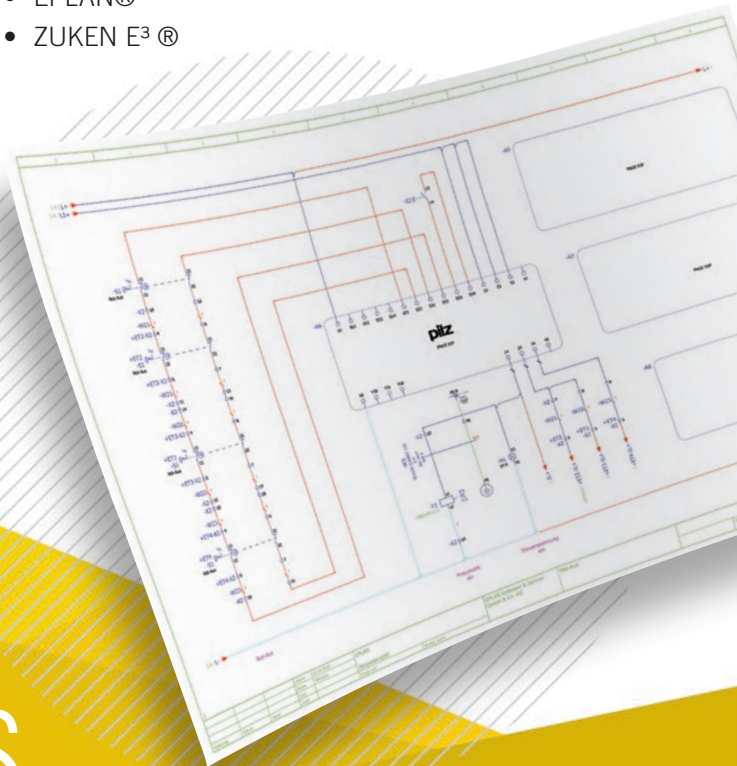

Once saved in the engineering department, the data are available to all departments involved in a project – Production, Purchasing, Service, Marketing, Sales, etc. – and can then be used throughout the entire product life cycle. HELiOS monitors all processes and constitutes the central “knowledge reservoir” of your company.

Independent into the future

As a multi-CAD capable PDM/PLM system, HELiOS offers an integrated comprehensive solution that can be interfaced with many different CAD systems, i.e. it can even support engineering departments with heterogeneous CAD environments. Use our CAD interfaces to optimize your working processes!

Multi-CAD interfaces for an easy drawing management

- EPLAN®
- ZUKEN E³®

HELiOS AND ECAD-SYSTEMS

isdgroup.com

Full integration into EPLAN Electric P8® and Zuken E³®

By interfacing EPLAN and Zuken with the PDM/PLM system HELiOS you can centrally manage your documents and exchange article and BOM data with ease. The rapid and individual provision of data takes place via bidirectional data exchange, without leaving the working environment of the ECAD platform.

In conjunction with the existing MCAD interfaces (AutoCAD®, Inventor®, SOLIDWORKS®, Navisworks® or HiCAD®) to HELiOS you are enabled to manage both mechanical and electro-technical design data conveniently and transparently. Data from various Microsoft Office® applications, too, can be managed via these interfaces.

This allows an easy, consistent and comprehensive management of all product- and project-related data.

Your benefits

- Automatic provision of circuit diagrams as PDF documents for all departments
- Bidirectional data exchange without having to quit the working environment of the ECAD platform
- Central data management of EPLAN and Zuken E³ projects with revision management
- Permissions management controlling accesses and modifications
- Support of workflow, release and modification processes of the ECAD project file
- Central article and BOM management
- Synchronization of EPLAN and Zuken E³ article database with HELiOS
- Interfaces to ERP systems with many standardized options (article master creation, BOM transfer, document transfer)

Success needs a strong partner

Check out our innovative PDM/PLM solution - if you want to learn more, we will be delighted to demonstrate the advantages of our products in a personalized presentation or a free one-to-one consultation. Don't hesitate to contact us – we'll be pleased to help you.
