

# Wiki - Language / Sprache

The ISD Wiki is multilingual, offering its content in German, English and, in some cases, also in Dutch language. The Wiki usually recognizes the required language automatically by the Browser settings of the user: If, for instance, English has been chosen for the **Language** setting, the Wiki will be started in English language.

If you wish to switch to a different language, click the icon for your personal space on the top right of the window (the one with the arrow).

- In the pull-down menu, choose **Settings**.

- Click **Edit**.
